Rapid Product Development Group, Inc. (RPDG) is excited to offer DSM Somos® WaterClear® Ultra Stereolithography Resin

Rapid Product Development Group, Inc. (RPDG) has announced the addition of an exciting new stereolithography resin from DSM Somos® called WaterClear® Ultra. “Clear SL resins are in growing demand,” says Somos Marketing Manager Eva Montgomery. “Simply put, they translate into better looking prototype lenses, packaging materials, and more.”

Miguel Diaz, Director of Mexico Manufacturing Operations for RPDG, Inc. stated, “The WaterClear® Ultra material is by far the clearest SLA material I have seen. It also builds very well and offers great accuracy. We are excited to have this material for stand alone SLA parts and also for master patterns for urethane cast parts. We traditionally have used hand polished CNC machined acrylic patterns for clear and tinted urethane castings, now we will also be able to use WaterClear® Ultra SLA patterns”.

About RPDG

Rapid Product Development Group, Inc. (RPDG) is a manufacturing and product development firm with quality, speed and customer service at the core of our corporate culture.

RPDG serves a global clientele in the automotive, computer, consumer products, healthcare and industrial equipment industry. The diverse customer requirements are met through our team of highly-skilled engineering and manufacturing professionals. RPDG provides turnkey solutions that combine development and manufacturing into one seamless process.

RPDG is headquartered in San Diego, CA with global facilities in Mexico, China, UK and India. For more information contact RPDG via e-mail at info@RPDG.com or the web at www.RPDG.com

About DSM Somos®

DSM Somos® is an unincorporated subsidiary of DSM Desotech—a world leader in the development of specialty UV-curable materials—and a member of the global DSM family. The Somos business has earned a global reputation for stereolithography (SL) material innovation and has been actively involved in the development of rapid prototyping materials since the late 1980s.

Today, DSM Somos continues to expand the rapid prototyping market with a full line of best-in-class ProtoFunctional® materials that replicate the performance of engineered thermoplastics, saving both time and money in new product development. DSM is an international chemicals and materials group headquartered in The Netherlands, with annual sales of EUR 8.1 billion and a workforce of approximately 22,000 employees at more than 200 sites worldwide.
